

NCvB statistics

Reports of occupational health practitioners are registered in the National Registry of Occupational Diseases. Occupational physicians and occupational health services are obliged to report cases of occupational diseases by the Dutch Occupational Health and Safety Act.

Information retrieved from this registry is useful for the insight in prevention and spreading, and development of occupational diseases. It is also used as a tool to detect particular cases.

In addition to this National Registry of Occupational Diseases, different surveillance schemes are set up to catch the underregistration of occupational health practitioners.

Updated December 2008

General

Notifications of occupational diseases per disease category in 2007

This table shows the number of reports of occupational diseases in the National Registry of Occupational Diseases per disease category in 2007.

	Number of reports	%
Diseases of the musculoskeletal system and connective tissue	2349	39,3
Diseases of the ear and mastoid process	1856	31,1
Mental and behavioural disorders	1192	20,0
Diseases of the skin and subcutaneous tissue	180	3,0
Other diseases	114	1,9
Diseases of the nervous system	104	1,7
Diseases of the respiratory system	90	1,5
Diseases of the circulatory system	44	0,7
Diseases of the digestive system	30	0,5
Diseases of the eye and adnexa	11	0,2
Endocrine, nutritional and metabolic diseases	2	0,0
Diseases of the genitourinary system	2	0,0
Total	5974	100

Notifications of occupational diseases per sex in 2007

This figure shows the distribution of the reports of occupational diseases in the National Registry of Occupational Diseases among men and women in 2007

Notifications of occupational diseases per occupational group in 2007

This table shows the number of reports of occupational diseases in the National Registry of Occupational Diseases per occupation group in 2007.

	Number of reports	%
Extraction and building trade workers	2444	40,9
Other associate professionals	381	6,4
